Software Engineering Lab

Building .NET Applications on the Oracle Database with Microsoft Visual Studio

Lab 6 – Disconnected Layer

QUIZ

- The Quiz will be during the week starting from 4 April 2026.
- You must attend in your section time or you will lose marks. (No Excuses)
- All ODP.Net Labs, SQL & PLSQL Fundamentals Labs will be included in the quiz.
- It will be a written quiz so bring your pen and an empty paper.
- **Note:** Student will write the stored procedure creation code (if any required) and will write the C# code from scratch.
- Grade: 5 marks
- Duration: 20 minutes

Agenda

Disconnected Mode

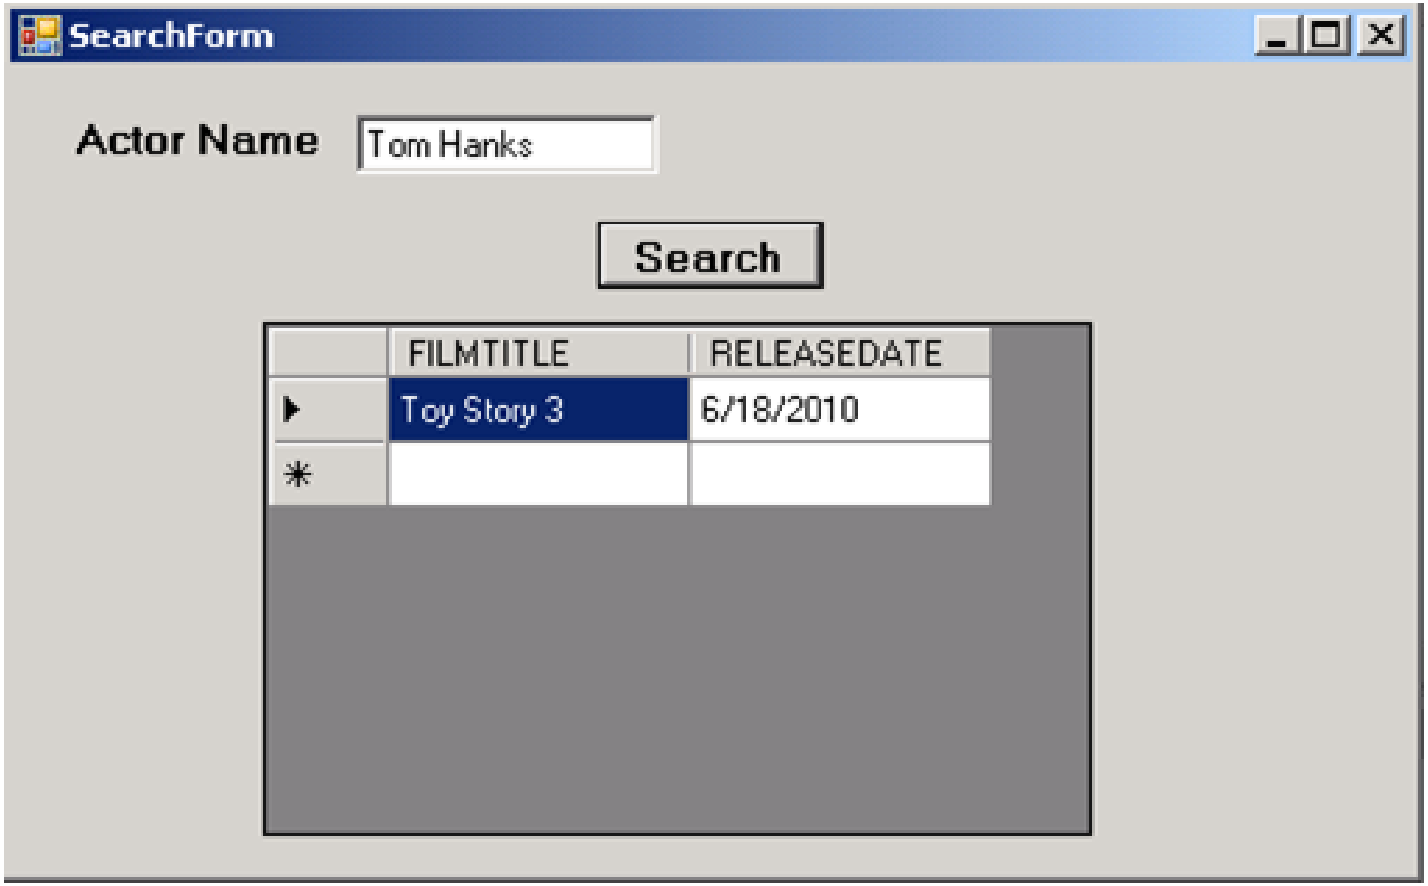
- Search Form:
  - Retrieving Actor’s Movies using Bind Variables

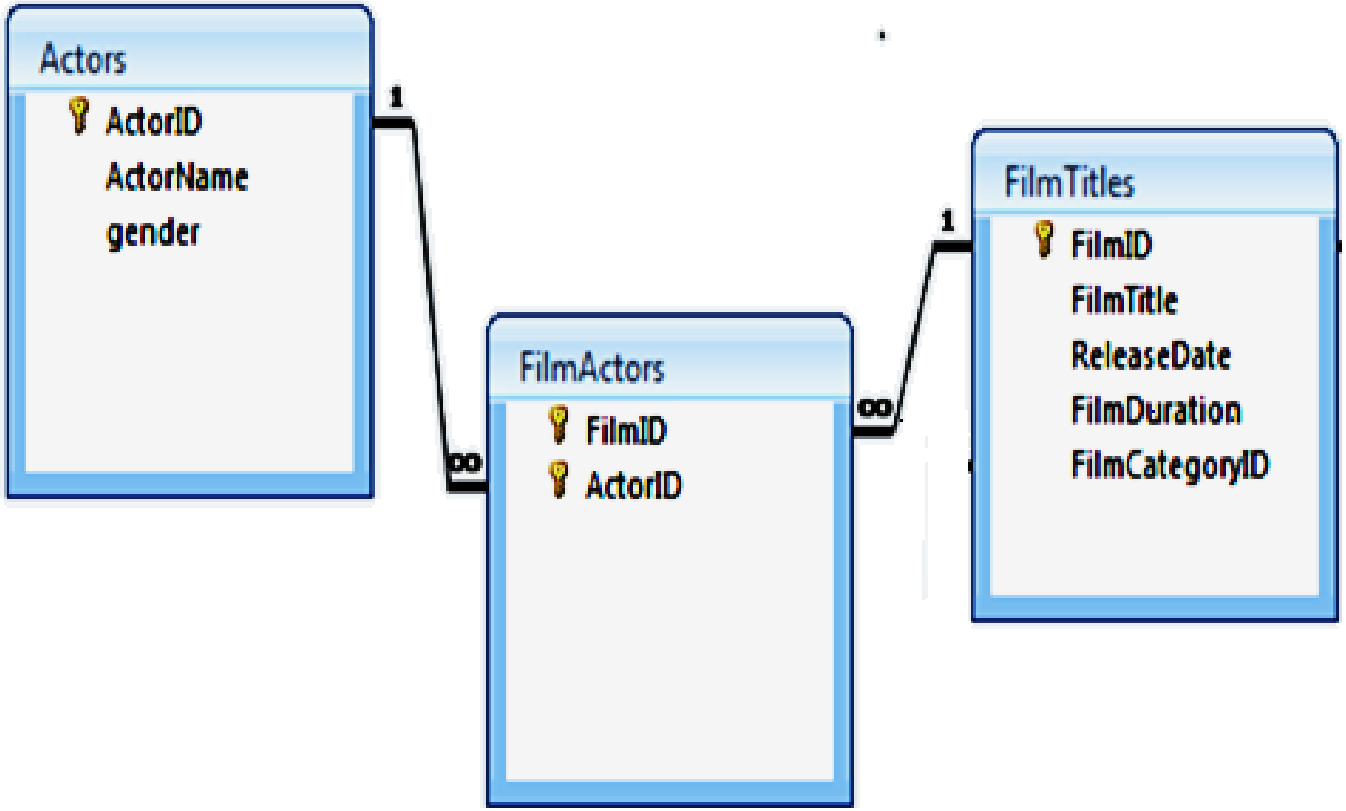
Using Disconnected Mode

1. Create Dataset object
2. Create OracleDataAdapter object
   1. Command string
   2. Connection string
3. Add command parameters
4. Call dataAdapter.Fill(dataset).
5. Display from dataset on DataGridView

Show Actor’s Movies

Display Films based on the actor name





```
Select FilmTitle,ReleaseDate
From FilmTitles f ,filmactors fa ,  actors ac
where f.FilmID = fa.FilmID
and    ac.actorID = fa.actorid
and    actorname = 'Tom Hanks'
```

```
using Oracle.DataAccess.Client;
using Oracle.DataAccess.Types;

namespace DisconnectedMode_Startup
{
    public partial class SearchFilms : Form
    {
        public SearchFilms()
        {
            InitializeComponent();
        }

        private void search_Click(object sender, EventArgs e)
        {
            string constr = "User Id=scott;Password=tiger;Data Source=orcl";
```

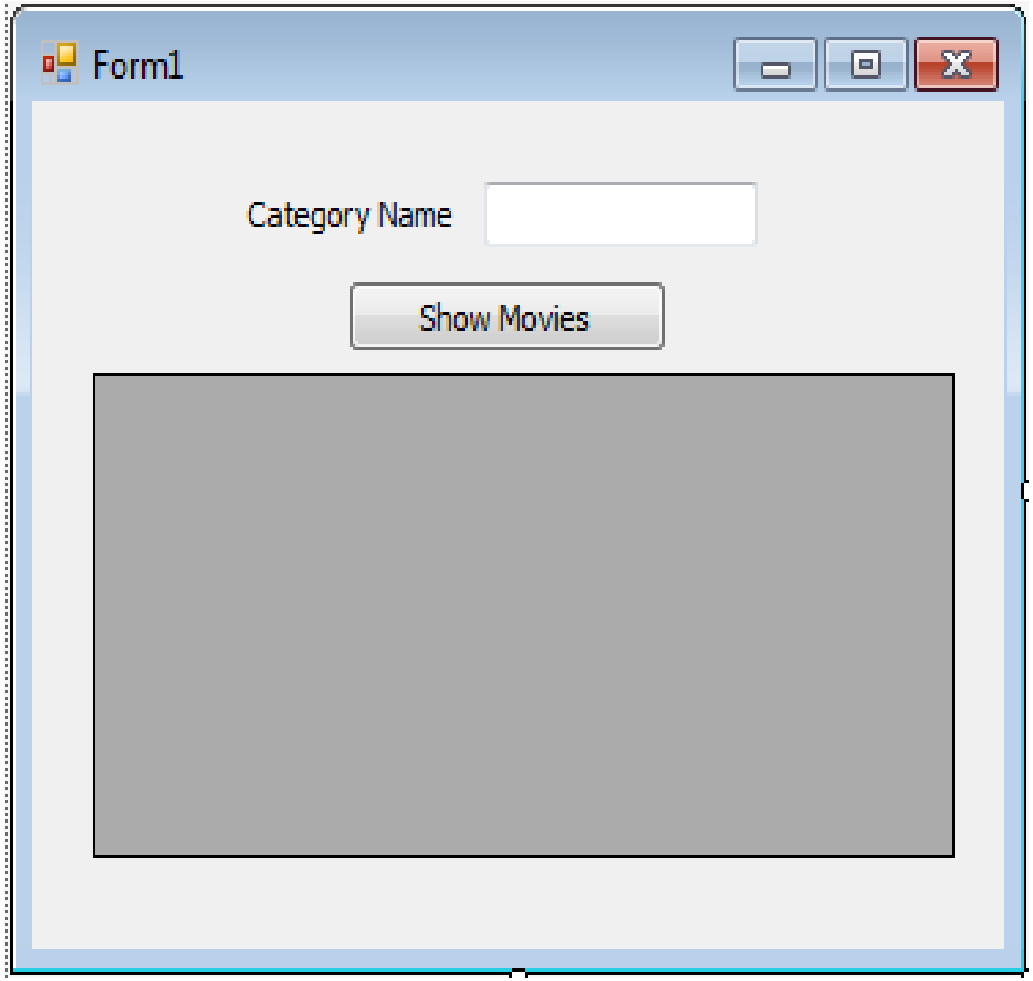
- Pass actor name parameter to the adapter

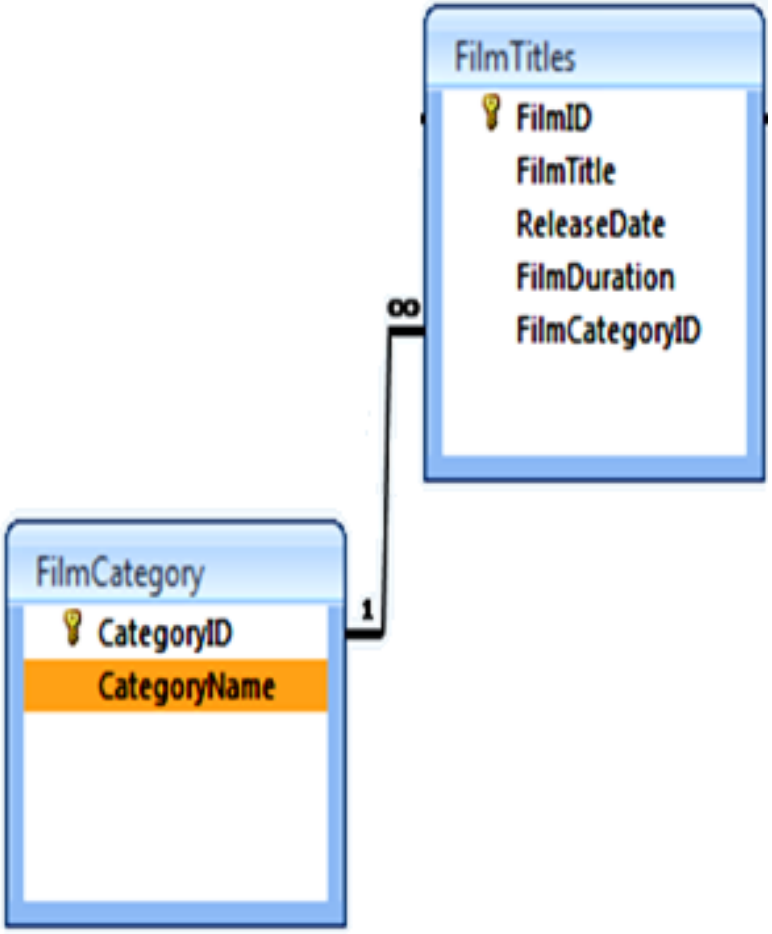
```
string cmdstr=  @"select FilmTitle, ReleaseDate
                from FilmTitles f , filmactors fa, actors ac
                where f.FilmID = fa.FilmID
                and ac.actorID = fa.actorid and actorname = :n ";

OracleDataAdapter adapter = new OracleDataAdapter(cmdstr, constr);
adapter.SelectCommand.Parameters.Add("n", txt_ActorName.Text);
DataSet ds = new DataSet();
adapter.Fill(ds);
dgv_Films.DataSource = ds.Tables[0];
}
```

Practice

Display Films in a Specific Category





Thank You
